

ABSTRACT

In a purchasing system and its method, an order receiving device, an order receiving method and a computer program, question data regarding changeable items of a virtual creature or the hardware holding this virtual creature, or a robotic device are to be transmitted to the order sender, and by reflecting the buyer's answer to the question, the predetermined processing to form the virtual creature and/or hardware is conducted. Moreover, in a data sales agent system and its method, a data sales device and its method, and a computer program, the consignment sales of a part of data or control data in the virtual creature or the robotic device are to be accepted, and said part of data will be sold.
